

# New OMRON Input Unit CQM1-ID213 in Box module

|                            |                       |
|----------------------------|-----------------------|
| Model                      | CQM1-ID213            |
| Brand                      | OMRON                 |
| Category                   | <a href="#">OMRON</a> |
| Product Type               | DC Input Module       |
| Input Points               | 32 points, digital    |
| Input Voltage              | DC 24V +10%/-15%      |
| Input Current              | 4mA (at DC24V)        |
| Input Impedance            | 5.6 k $\Omega$        |
| ON Voltage                 | Min. DC 14.4V         |
| OFF Voltage                | Max. DC 5.0V          |
| Response Time (ON Delay)   | Max. 8ms              |
| Response Time (OFF Delay)  | Max. 8ms              |
| External Connection        | Connector             |
| Current Consumption (DC5V) | Max. 170mA            |

## Note:

Invshop recommends that you inquire with the original factory or its agents about the latest production status and technical information about CQM1-ID213. The product parameters displayed on Invshop are entered by Invshop engineers according to the specifications, and efforts have been made to minimize errors, but we cannot guarantee the complete correctness of the parameters. Please refer to the specification sheet!
