

# New & original FANUC A16B-3200-0325 Circuit board

Model	A16B-3200-0325
Brand	FANUC
Type:	Memory Board / SRAM Module
Function:	Stores system parameters, programs, and pitch error compensation data.
Key Component:	Battery-backed SRAM (Static Random-Access Memory).
Voltage:	+5V DC (Standard logic voltage).
Application:	Used in FANUC 0, 10, 11, 12, 15, 16, 18, 20, 21 series and other CNC systems.
Critical Data:	Holds CNC parameters, PMC parameters, macros, and tool offsets.
Warning:	Data loss occurs if the battery is depleted or the board is damaged.
Handling:	Electrostatic discharge (ESD) sensitive device.

## Note:

Invshop recommends that you inquire with the original factory or its agents about the latest production status and technical information about A16B-3200-0325. The product parameters displayed on Invshop are entered by Invshop engineers according to the specifications, and efforts have been made to minimize errors, but we cannot guarantee the complete correctness of the parameters. Please refer to the specification sheet!
